Applicant(s)
Harrenstien et al.

Examiner
Pablo Tran

Group Art Unit
2749

☒ Responsive to communication(s) filed on Apr 5, 2000

☐ This action is **FINAL**.

☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11; 453 O.G. 213.

A shortened statutory period for response to this action is set to expire 3 month(s), or thirty days, whichever is longer, from the mailing date of this communication. Failure to respond within the period for response will cause the application to become abandoned. (35 U.S.C. § 133). Extensions of time may be obtained under the provisions of 37 CFR 1.136(a).

Disposition of Claims

☒ Claim(s) 1-8, 10-12, and 16-25 is/are pending in the application.

Of the above, claim(s) _____ is/are withdrawn from consideration.

☐ Claim(s) _____ is/are allowed.

☒ Claim(s) 1-8, 10-12, and 16-25 is/are rejected.

☐ Claim(s) _____ is/are objected to.

☐ Claims _____ are subject to restriction or election requirement.

Application Papers

☐ See the attached Notice of Draftsperson's Patent Drawing Review, PTO-948.

☐ The drawing(s) filed on _____ is/are objected to by the Examiner.

☐ The proposed drawing correction, filed on _____ is ☐ approved ☐ disapproved.

☐ The specification is objected to by the Examiner.

☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. § 119

☐ Acknowledgement is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d).

☐ All ☐ Some* ☐ None of the CERTIFIED copies of the priority documents have been

☐ received.

☐ received in Application No. (Series Code/Serial Number) _____.

☐ received in this national stage application from the International Bureau (PCT Rule 17.2(a)).

*Certified copies not received: _____.

☐ Acknowledgement is made of a claim for domestic priority under 35 U.S.C. § 119(e).

Attachment(s)

☒ Notice of References Cited, PTO-892

☐ Information Disclosure Statement(s), PTO-1449, Paper No(s). _____

☐ Interview Summary, PTO-413

☐ Notice of Draftsperson's Patent Drawing Review, PTO-948

☐ Notice of Informal Patent Application, PTO-152

Art Unit: 2746

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

2. Claims 1-7, 10-12, 16-20, and 22-25 are rejected under 35 U.S.C. 102(e) as being anticipate by *Verkler et al.* (US patent 5,850,517).

As per claims 1, 7, 10, 16, and 24-25, *Verkler et al.* further disclose a method and apparatus for transmitting information from a server to a client station in a mobile-based client-server system, comprising the steps of:

- evaluating a received message to determine whether the server has a selected type and quantity of information waiting for the client station, the received message prepared by the server without the client station first initiating a connection with the server (col. 4/ln. 1-38);
- generating a signal containing a telephonic address of a communication transceiver associated with the server and instructions for establishing a log-on connection with the server if the server has a selected type and quantity of information waiting for the client station (col. 4/ln. 1-26, col. 8/ln. 7-16, 59-62, col. 9/ln. 1-22, and col. 10/ln. 24-29); and

Art Unit: 2746

- transmitting the signal to a transceiver associated with the client station, the client station transceiver configured to establish a communication link with the server transceiver based on the telephonic address (col. 4/ln. 1-26, col. 8/ln. 7-16, 59-62, col. 9/ln. 1-22, and col. 10/ln. 24-29).

Verkler et al. discloses Applicant's invention except teaching transceiver associated with the server and client station. However, it is inherent that both the server and client station comprises transceivers in order to provide wireless communication path. It is inherent to one of ordinary skill in the art at the time of Applicant's invention to incorporate transceivers, inherently to provide mobile link, in conjunction with a communication link for client-server system as taught by *Verkler et al.*.

As per claim 2, *Verkler et al.* further disclose establishing a connection between the client station and server in response to a received message (col. 5/ln. 31-39)

As per claim 3, *Verkler et al.* further disclose wherein the connection between the client station and server is established via the respective client station and server transceivers (fig. 2, col. 3/ln. 56-67, col. 5/ln. 6-col. 6/ln. 15, col. 9/ln. 1-22, and col. 10/ln. 24-29).

As per claims 4-6, 11-12, and 20, *Verkler et al.* further disclose comprising the further steps of:

- evaluating a received message at the client station to determine whether the information is of a selected type/quantity (col. 4/ln. 12-38, col. 6/ln. 66-col. 7/ln. 2, col. 9/ln. 24-41); and

Art Unit: 2746

- establishing a connection between the client station and server in response to a received message if the information is of a selected type/quantity (col. 4/ln. 12-38, col. 6/ln. 66-col. 7/ln. 2, col. 9/ln. 24-41).

As per claim 17, *Verkler et al.* further disclose the stored program causing the client station to perform the additional steps of:

- transmitting a first request for the information to the server via the established communication link (fig. 3, col. 4/ln. 12-55, col. 6/ln. 50-col. 7/ln. 48);
- receiving the requested information (fig. 3, col. 4/ln. 12-55, col. 6/ln. 50-col. 7/ln. 48);

and

- transmitting additional information to the server via the established communication link (fig. 3, col. 4/ln. 12-55, col. 6/ln. 50-col. 7/ln. 48).

As per claim 18, *Verkler et al.* further disclose wherein the additional information comprises a further data request (fig. 3, col. 4/ln. 12-55, col. 6/ln. 50-col. 7/ln. 48).

As per claim 19, *Verkler et al.* further disclose a mobile-based client-server system, comprising:

- a client station adapted for communication with an associated client station transceiver (col. 4/ln. 12-55); and
- a server configured to periodically receive or generate information to be delivered to the client station, the server linked to an associated server transceiver (col. 4/ln. 12-55), wherein

Art Unit: 2746

- the server is further configured to transmit a message to the client station via the respective server and client station transceivers upon receiving or generating a selected threshold of information to be delivered to the client station without the client station first initiating a connection with the server (col. 4/ln. 12-55).

As per claims 22-23, *Verkler et al.* further disclose whether the information is of a type/quantity requiring that the client station be notified (fig. 3, col. 4/ln. 12-55, col. 6/ln. 50-col. 7/ln. 48).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 8 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over *Verkler et al.* (US patent 5,850,517).

As per claim 8 and 21, *Verkler et al.* disclosed Applicant's invention except for teaching wherein the server transceiver sends the message to the client station transceiver in the form of an SMS paging message. It would have been useful to provide an SMS paging message to provide automatic answer transmission. However, such is notoriously well-known in the art the Examiner takes official notice of such. Therefore, it would have been obvious to one of ordinary skill in the

Art Unit: 2746

art at the time of Applicant's invention to utilize the method of SMS paging message, well-known in the art, in conjunction with a communication link for client-server system as taught by *Verkler et al.*.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Tett (5,635,918), *Harrison et al.* (5,796,727), *Vazana* (5,850,519), *Eggleston et al.* (5,958,006), *Dillon* (6,067,561), *Smith* (5,835,724), *Doviak et al.* (5,717,737), *Hidary* (5,852,775), and *Gilchrist et al.* (5,745,695) discloses method and apparatus for controlling message delivery to wireless system.

6. Any inquiry concerning this communication or earlier communication from the examiner should be directed to Pablo Tran whose telephone number is (703)308-7941. The fax number for this Group is (703)308-6306 and (703)308-6296.

Any inquiry of a general nature to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703)305-3900.
